FORMTEK-MAINE

Product Lines

cooper-weymouth, peterson

Cooper-Weymouth, Peterson is the leading manufacturer of coil handling equipment and systems serving the metal working industry for over 70 years. From individual coil handling and processing equipment to totally integrated systems, CWP can provide the right solution for almost any coil processing application.

CoilMate® Dickerman

CoilMate® / Dickerman® is the only manufacturer you need for all your narrow width, light gauge coil and material processing applications. Products include a variety of stock payoff reels, pallet decoiling and rewinding equipment, straighteners, servo feeds and even scrap choppers.

IOWA PRECISION
COIL METAL PROCESSING DIVISION

Iowa Precision is the leader in custom designed and manufactured blanking and multi-blank processing systems. IPI has the experience and proven know-how to develop exacting coil metal processing systems to meet the specific goals of Iowa Precision Coil Metal Processing customers worldwide.

B&K

B&K backed-up roller levelers are designed for precision coil strip flatness and shape correction for defects such as coil set, cross bow, edge wave, and center buckle, they can compensate for "draw" in roll forming applications, and can eliminate "dished" stampings. The result is significantly improved flatness for increased productivity and part quality.

ROWE
Machinery & Manufacturing

ROWE has been manufacturing coil handling equipment in any configuration for almost any application since 1949. Our equipment can be configured for press feed and cut-to-length systems. ROWE even has many different styles of combination equipment to accommodate customers with limited floor space.
